Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The print processing apparatus of the present application comprises: inquiring means to communicate with the print management apparatus to inquire whether a printer information description file stored in said print management apparatus is updated; receiving means for receiving information for accessing the printer information file as a result of the inquiry; and downloading means for downloading the printer information description file on the basis of the accessing information. In the prior art of Sasaki et al., the printer server apparatus inquires within itself to determine whether the printer description file is updated and updating the printer description file in the client PC as a result of the inquiry. Because of this, the present application appears to distinguish over the prior art of Sasaki.
